

HAMIDREZA DELSHAD

Frontend Developer (React.js, Next.js, Node.js, C#)

Mashhad | +989156020204 | delshad.swdn@gmail.com | Portfolio: <https://hdelshad.com/>

GitHub: <https://github.com/Hamidswed> | LinkedIn: <https://www.linkedin.com/in/hamidreza-delshad/>

PROFESSIONAL SUMMARY

Results-driven Frontend & Full Stack Developer with expertise in React.js, Next.js, Node.js, and C#. Proven track record of building scalable, responsive web applications and enterprise-grade ERP systems for international clients. Adept at leveraging modern AI-powered development tools (Cursor, Kiro, Qwen, DeepSeek) to accelerate coding, optimize architecture, and significantly reduce debugging time. Strong background in cross-functional agile teams, UI/UX implementation, and RESTful API integration within full-stack architectures.

TECHNICAL SKILLS

- **Frontend:** TypeScript, JavaScript (ES6+), React.js, Next.js, Redux Toolkit, React Query, React Router, Tailwind CSS, SCSS, Material UI, Mantine, Ant Design.
- **Backend & Database:** Node.js, Express.js, C# (.NET), MongoDB, RESTful APIs, JWT Authentication, LINQ.
- **AI & Developer Tools:** Cursor, Kiro, Qwen, DeepSeek, Prompt Engineering, AI-assisted Code Review & Refactoring, AI-driven Debugging.
- **DevOps & Cloud:** Docker, AWS, Netlify, Bash, Git, CI/CD basics.
- **Design & Others:** Figma, Adobe Creative Suite (Photoshop, Illustrator, InDesign, XD), Web3.js, Python, Java.
- **Languages:** English (Advanced), Swedish (Intermediate), Persian (Native).

PROFESSIONAL EXPERIENCE

PegaheAftab

Iran, Tehran (remote)

Frontend Developer – Signum Framework

02/2025 – Present

- Working within the **Signum Framework**, a full-stack architecture combining React and TypeScript on the frontend with C# on the backend, to build enterprise-grade applications.
- Design and develop complex UI components and data-intensive reporting modules (Logsheet, Logsheet Templates, Maintenance Projects, Work Requests) featuring advanced filtering and dynamic data handling.
- Leverage AI-powered IDEs (Cursor, Kiro) to accelerate feature development, automate boilerplate code generation, and conduct AI-assisted peer reviews, improving overall team velocity.
- Implement robust state management and optimize data fetching patterns (React Query) to ensure seamless and efficient API integration.
- Collaborate closely with backend teams to integrate C#-based RESTful APIs, design clean interfaces, and implement complex LINQ expressions for high-performance enterprise operations.
- Participate actively in Agile ceremonies (sprint planning, retrospectives) and conduct code reviews to enforce coding standards and improve code quality.

Hantverkshjälpen AB

Sweden, Stockholm (remote)

Frontend Developer

08/2024 – 11/2024

- Contributed to the development of "Time Flow", a comprehensive time management and productivity tool, streamlining task tracking and project management for enterprise clients.
- Utilized Next.js (SSR/SSG) and TypeScript to build scalable, maintainable, and SEO-friendly web applications, improving page load speed and user experience.
- Coordinated daily tasks and project milestones using Jira, ensuring 100% on-time delivery of sprint goals in an agile environment.
- Created dynamic, accessible, and user-friendly registration forms using React Hook Form, enhancing user data collection and reducing validation errors.
- Implemented responsive, mobile-first navigation menus and layouts using Tailwind CSS, ensuring a seamless user experience across all device sizes.
- Worked closely with backend developers and UI/UX designers to integrate APIs and translate Figma designs into pixel-perfect, interactive interfaces.

Swedcon 18 AB

Sweden, Växjö (remote)

Frontend Developer (Online Doctor Appointment Service)

08/2022 – 07/2024

- Developed and maintained a telemedicine web application allowing users to remotely book appointments and conduct video consultations with doctors.
- Implemented apps and landing pages from concept through deployment using React.js, Next.js, Mantine, and SCSS, ensuring strict adherence to graphic standards and branding.
- Maintained, optimized, and troubleshooted the application by resolving 10+ critical bugs per sprint, significantly improving application stability and user retention.

- Collaborated effectively in a cross-functional team of 25+ members via Discord, GitLab, and GitHub, actively sharing knowledge and learning from senior developers.
- Integrated AI-assisted debugging tools to quickly identify and resolve complex frontend state issues, reducing average debugging time.

Integrify Academy

Finland, Helsinki (remote)

FullStack Developer (Trainee) & Tech Lead

11/2022 – 03/2023

- Implemented 7+ full-stack websites and landing pages from concept through deployment, utilizing React.js, Node.js, and MongoDB.
- Standardized all frontend outputs with a new, responsive, mobile-first approach, improving mobile usability scores across all projects.
- Assessed UX and UI designs for technical feasibility in Figma, providing actionable feedback to designers to ensure smooth development workflows.
- Collaborated daily in Slack and GitHub with product team members to implement new feature developments, conduct code reviews, and manage version control.
- Led the technical direction for the "Food Blog" and "Mobile Store" projects, designing the architecture, folder structure, and backend CRUD functions from scratch.

KEY PROJECTS

Enterprise Resource Planning (ERP) System

Iran, Tehran, PegaheAftab

Full Stack Developer (Signum Framework: React.js, TypeScript, C#)

2025 – Present

- Contributing to a large-scale ERP ecosystem built on the **Signum Framework**, a full-stack solution combining React/TypeScript frontend with C# backend services.
- Spearheaded the development of complex, data-intensive reporting modules (Logsheet, Logsheet Templates, Maintenance Projects, Work Requests) featuring advanced filtering and dynamic data handling.
- Engineered robust backend APIs and services using C#, designing clean interfaces, implementing complex LINQ expressions, and optimizing data retrieval for high-performance enterprise operations.
- **Tech Stack:** Signum Framework, React.js, TypeScript, C#, RESTful APIs, LINQ, Advanced Data Filtering, OOP & Interface Design.

Time Flow System

Sweden, Stockholm

Frontend Developer

2024

- Contributed to a comprehensive time management and productivity tool designed to streamline task tracking and project management.
- Utilized Next.js and TypeScript for building scalable and maintainable web applications, leveraging Tailwind CSS for rapid, responsive UI development.

Kajutan Restaurant

Sweden, Holmsund

Full-Stack Developer

2024

- Developed a comprehensive restaurant website with functionalities for admin sign-up, search, and comment features, enabling admins to perform CRUD operations on the menu.
- Designed and implemented the project from scratch, including UI/UX design, workflow, folder structure, React Query configuration, and secure backend CRUD functions.
- **Tech Stack:** React.js, React Query, React Router Dom, Tailwind CSS, Node.js, Express, JWT, MongoDB.

PERSONAL PROJECTS

- **Full-Stack Blog App with Admin Panel:** Built a secure blogging platform using Next.js (SSR), Node.js, and MongoDB. Features include JWT authentication, admin CRUD operations, server-side search, pagination, and a moderated comment system.
- **Job Portal Website:** Developed a multi-role platform (Job Seeker, Employer, Admin) using React.js, React Query, Node.js, and Express. Implemented complex state management for job proposals, applications, and user dashboards.
- **Hotel Booking Frontend:** Designed and developed a responsive hotel booking interface focusing on intuitive UX and seamless data fetching.

EDUCATION & COURSE CERTIFICATIONS

- Master of Bioinformatics | University of Skövde, Sweden | 2022-2023
- Bachelor of Science in Computer Science | Payam Noor University, Iran | 2004 – 2009
